## A Medical Assistant's (MA) Role

Medical assistants perform administrative and certain clinical duties under the direction of a physician. As an essential part of the healthcare team, an MA is responsible for obtaining general health data and performing a variety of back and front office duties. In our training program, you will develop the entry-level skills necessary to be competitive in the workforce.

## Nationally Accredited

This class prepares individuals for the Certified Clinical Medical Assistant exam. Delgado's MA program prepares you to function under the supervision of a licensed physician or health care provider. Our graduates are eligible to take the national certification examination.

*Tuition assistance may be available for those that qualify.*
