Build yourself a great career by enrolling in our carpentry program! Our carpentry program prepares students with skills and knowledge for a career in residential construction. Safety is the foundation of all phases of the program which involves actual work situations emphasizing teamwork, work ethics, safety, and communication. Classroom theory is also supported with extensive hands on application using various hand tools and power tools. In addition to the Certificate of Technical Studies, students will earn NCCER Carpentry Level 1 and 2 certification.
