Attention Hospital Director;

Students applying to the Veterinary Technology Program at Delgado Community College are required to complete 50 hours of observation in order to apply to the Program. Students must also ask a DVM or RVT to complete the clinical observation form, as this is a part of the application packet. Please consider allowing this prospective student to complete these hours at your clinic. The student is not required to participate in any procedure, only to observe, and ideally shadow a technician and/or DVM for a total of 50 hours. The purpose of this is to ensure a student applying to the program is educated on the responsibilities of a veterinary technician, as well as the daily operations of a veterinary clinic. Please do not hesitate to contact me with any questions or to discuss this in further detail.

Kind regards,

Jennifer Limon EdD, RVT
