

Electrician Certificates: 22 - 30 credit hours

ABOUT

Delgado offers Certificates of Technical Studies in Residential, Commercial and Small Industrial Electrician. All programs contain practical (hands-on) training integrated with theory and study of the National Electrical Code, which prepares students to take a national licensure exam. Upon completion of each program, students are eligible to receive the National Center for Construction and Education Research (NCCER) Core and Electrical Level 1 certifications. Students who complete all electrician programs will receive NCCER Electrical Levels 1-4 certifications.

Commercial - Commercial electricians may design electrical systems from blueprints or install conduit and run electrical wiring in commercial buildings such as retail stores, schools, and office buildings.

Residential - Residential electricians are responsible for installing and repairing all electrical wiring in a residential setting.

Small Industrial - The Small Industrial Electrician program prepares students to install, service, and repair wiring, conduits, fixtures and other electrical devices and systems in an industrial setting.
