

PHLEBOTOMY

TECHNICIAN TRAINING

**Next Class:
November 21 -
December 23, 2022**

Our Certified Phlebotomy Technician training will prepare you to draw blood samples from patients in a clinical laboratory or public health setting and prepares you for a national certification exam.

The training combines 60 hours of classroom instruction that will provide you with practical experience (externship hours vary by site). You will receive hands on training that includes drawing blood samples from patients, producing quality laboratory results, gaining the trust and confidence of patients, and much more.

By the end of the course, you will be prepared to take the nationally recognized Certified Phlebotomy Technician (CPT) exam through the National Health Career Association (NHA).

Tuition \$1,000*

**Subject to change*
